The Graham Education and Research Foundation supports the Evarts A. Graham Memorial Traveling Fellowship program. Since the inception of the program in 1951, fifty-one young surgeons from twenty-eight countries have completed their training at thoracic surgical centers throughout North America. The Foundation also supports the Research Scholarship program, which was established in 1985. Annual and planned gifts to the Foundation help support these fellowship and scholarship programs and provide an opportunity for donors to leave their legacy in cardiothoracic surgery. Planned gifts can include a bequest in one's will, through a life insurance policy or retirement plan or through a charitable lead or remainder trust.

EVARTS A. GRAHAM MEMORIAL TRAVELING FELLOWSHIPS

The Evarts A. Graham Memorial Traveling Fellowship was established in 1951 by The American Association for Thoracic Surgery. Administered through the Graham Education and Research Foundation, it provides grants to young surgeons from abroad who have completed their formal training in general, thoracic, and cardiovascular surgery. The award allows the recipient to study a year to intensify his training in a program of special interest and to travel to several sites to broaden his overall training and increase his contacts with thoracic surgeons internationally. Awards are made to surgeons of unique promise who have been regarded as having potential for later international thoracic surgical leadership. Since the inception of the Graham Fellowship, 53 young surgeons from 27 countries have completed their training at thoracic surgical centers.

THE THORACIC SURGERY FOUNDATION FOR RESEARCH AND EDUCATION

YOUR FOUNDATION FOR RESEARCH AND EDUCATION

Unlike other organizations to which you make philanthropic contributions, the Thoracic Surgery Foundation for Research and Education works directly for your specialty. TSFRE supports research and education initiatives to increase knowledge and enhance treatment of patients with cardiothoracic diseases; develops the skills of cardiothoracic surgeons as surgeon-scientists and health policy leaders; and, strengthens society's understanding and trust in the profession. TSFRE is making a difference in cardiothoracic surgery. This is possible only because of your support. TSFRE is entirely supported through private donations. If you have not yet made your annual gift to TSFRE, now is the time! If you make an annual gift of appreciated stocks, bonds or mutual funds, you avoid capital gains tax and earn an income tax deduction by donating rather than selling these assets. This may be better for you than a gift of cash. If you have been thinking of making a charitable contribution to TSFRE, this may be the time to consider a planned gift. Often, this type of giving enables an individual to give a larger gift at a cost that is actually lower than if the gift were to be made outright. You may also find that planned giving enables you to meet other personal financial goals while making significant charitable gifts. You may give to TSFRE through a revocable instrument, such as a bequest in your will, or through an irrevocable instrument like a charitable lead trust or a charitable remainder trust. You may also give through a life insurance policy or your retirement plan. For more information about your annual gift or a deferred gift, contact the Thoracic Surgery Foundation for Research and Education at 900 Cummings Center, Suite 221-U, Beverly, Massachusetts, 01915.

ALLEY-SHERIDAN EXECUTIVE COURSE SCHOLARS. The Alley-Sheridan Fund was established within the Thoracic Surgery Foundation for Research and Education by Mr. David Sheridan on behalf of his lifelong friend and collaborator, Dr. Ralph Alley, to provide educational opportunities, especially in health care policy matters for cardiothoracic surgeons. This fund has been used to support the Health Policy Leadership Program offered in the past in partnership with Harvard University and more recently with Brandeis University. This initiative provides a comprehensive, weeklong program that focuses on the changing nature of the nation's health care system, its management and how physicians can impact that system. To date, TSFRE has named 117 individuals to receive Alley-Sheridan Scholarships to attend this course.
